

SOROTI BRANCH

Branch Activities and Updates

Eng. Julius Eonya, Chairperson Soroti Branch

Outreaches

The branch conducted an outreach to Epel Memorial Vocational Training Institute in Katakwi District, led by the Branch Chairman, Branch Treasurer, and some Branch Members. The discussions focused on community engagement and providing career guidance to students. Additionally, a radio talk show was held in Soroti City, featuring the Branch Chairman, a Branch Executive Member, and a Branch Member, to further promote community outreach and engagement. Both activities underscored the branch's commitment to empowering communities and inspiring future professionals.

Ethics Garage

On 14th November 2024, we held an Ethics Garage moderated by the Branch Chairperson, Eng. Julius Eonya, and officiated by the Vice President of Public Relations, Practice and Ethics (PRPE), Eng. Diana Keesiga. The event featured a panel discussion with District Local Government Engineers under the theme: **"Integrity in Action: Observing Engineering Ethics and Practice in the Local Government Terrain."** We extend our appreciation to the panelists and presenters for sharing their valuable insights with the participants.

Registration Clinic

On 30th October 2024, we conducted a Registration Clinic officiated by the Vice President of Membership, Education, and Training (VP MET), Eng. Henry Mpuuga. The event brought together the Branch Chairman, the entire Branch Executive, and Branch Members to discuss and facilitate member registration. We appreciate all participants for their active engagement in advancing professional membership within the branch.

Field Visits

On 30th November 2024, the branch organized field visits to key infrastructure projects, including the Karuma Bridge Rehabilitation, the Karuma Hydro Power Dam (UEGCL), and the Karuma-Gulu Water Supply Project (NWSC). These visits focused on community engagement, career guidance, and technical discussions on bridge rehabilitation, piped water processing for Gulu and nearby towns, and hydro-electricity generation. Such trips are invaluable to engineers as they provide practical insights into large-scale project implementation, foster knowledge sharing, and enhance professional growth through firsthand exposure to engineering innovations.

Condolences

We extend our heartfelt condolences to:

- **Eng. Amuya**, who lost his brother.
- **Mr. Isamat David**, who tragically lost both his parents, laid to rest on the same day.

The UIPE Soroti Branch stands united with you.

Plans for the Next Quarter

- Conduct visits to industries and educational centers
- Organize professional tours to various locations
- Support members in achieving their registration milestones
